The Chatham House rule applies to all discussions in the workshop, i.e., to increase openness of discussion, participants are free to use the information received, but neither the identity nor the affiliation of the speaker(s), may be revealed. Regarding languages, we suggest the *Swiss+* solution: presentations and comments can be made in English, German, or French.

Detailed Program of the Workshop (as of 21 March 2024)

Research Sessions

The program offers six research sessions with a total of 17 research presentations during three time slots. Pick your favorite papers from the parallel sessions and feel free to change between sessions according to your interests. (Organisiert von: EFV, SECO)

Keynote: 17:15 - 18:30

Keynote
Room: A140 Poverty: Measurement and Effective Policies.
Andrea Brandolini, Banca d'Italia

Presentation guidelines for presenters in the research sessions

Note that the SNoPE Workshop is not just another academic conference. We wish to foster the exchange between academia and policy makers. Therefore, we ask every presenter to clearly outline the relevance and implications for Swiss public policy. Each presentation should conclude with a slide about the policy implications of the presented research. Of course, methodological aspects remain important, however, the presentation should strongly emphasize and discuss the link and relevance to Swiss public policy.

- Each presenter has a maximum of 17 minutes for presentation. Presentations may of course be shorter to leave more room for questions and comments from the audience.
- The last presenter in each research session is the session chair. (S)he makes sure that each of the presentations benefits from the audience's attention for 30 minutes and contacts the organizers in case of technical problems. Session chairs must be strict in enforcing the presentation time of 17 minutes to leave enough time for discussion after each presentation.
- There are no discussion openers. Everybody is welcome to make comments and ask questions: these may range from policy implications to methodological questions.

More information about the SNoPE network can be found [here](#).
