

Chaowei Nie is a visiting Ph.D. student from the Child Language Lab in the School of Foreign Languages at Central South University. His research focuses on child psycholinguistics, with particular interests in first language acquisition and language disorders, especially in children with neurodevelopmental conditions such as Autism Spectrum Disorder and Developmental Language Disorder. His current study investigates the acquisition of *wh*-questions in Mandarin, with a focus on children with Autism Spectrum Disorder. Previously, for his master's degree in psycholinguistics, he examined complex Mandarin constructions such as *ba* and *bei* sentences in children with Developmental Language Disorder and Autism Spectrum Disorder. His strong interest in the relationship between language and cognition, particularly in cases of language impairment, earned him a scholarship to collaborate with the ABCCD lab for a year.
