Ph. D. position at the University of Fribourg/Switzerland, Chair of Industrial Economics

We are looking for a candidate with a strong interest in behavioral economics. The successful candidate will be employed at the Chair of Industrial Economics. The envisioned starting date is August 1st 2025, but could also be arranged flexibly around that date if necessary. The latest start date should be January 1st 2026.

An interest in behavioral economics is required. A good command in programming (Python) and an interest in experimental methods is desirable. The position is mostly focused on conducting research. Supporting the chair in teaching and some administrative tasks will also be part of this position. Participation in an SNF grant project is possible if the successful candidate is interested. Participation in international conferences and in doctoral courses at the study center Gerzensee (www.szgerzensee.ch) is encouraged.

Applicants should hold a degree in economics or a related field, preferably with a specialization in behavioral economics, organizational economics and /or empirical (experimental) methods. A good command of English and German would be a strong asset.

The University of Fribourg is located in the heart of Switzerland in a bilingual (German/French) environment. The salary is competitive (100% employment).

Interested candidates are asked to send their application by email, containing a motivation letter, a detailed CV, all relevant educational records as well as references.

until January 31st, 2025
